Respiratory Infections: An Overview of Outpatient Antibiotic Therapy - B. Joseph Guglielmo, PharmD
Identify those patients with acute bacterial rhinosinusitis or acute otitis media who may benefit from antibiotics; Review guidelines about the treatment of streptococcal pharyngitis and acute bronchitis; Describe side effects associated with macrolides and fluoroquinolones; Discuss findings from microbiome studies about the prolonged effects of antibiotics; Counsel patients about alternative treatments for reducing symptoms of the common cold.
QUALIFIES FOR CLINICAL PHARMACOLOGY
FP 65 - 16

Travel Medicine/Interesting Infections - Prasanna Jagannathan, MD and Richard Jacobs, MD
Recommend ways in which patients can minimize their risk for infectious diseases during travel; Provide patients with up-to-date information about vaccinations and prophylactic medications for travel; Treat illness in returning travelers; Diagnose and treat common infections in the outpatient setting; Recognize and manage uncommon infections, including acute epiglottitis, Lemierre syndrome, and spinal epidural abscess. QUALIFIES FOR INFECTIOUS DISEASE
FP 65 - 17

Current Concerns in Primary Care - Kathleen A. Mammel, MD and Julie K. Prussack, MD
Thoroughly assess patients who exhibit signs or symptoms of an eating disorder; Recognize signs and symptoms of anorexia, bulimia, and avoidant/restrictive food intake disorder; Advise patients about levels of care and family-based treatment of EDS; Follow screening guidelines for cancer and osteoporosis in transgender men and women; Counsel transgender patients about hormone therapy.
FP 65 - 18

Complex Headaches - Mark W. Green, MD and Alexander Feoktistov, MD
Determine if a headache is primary or secondary in origin; Screen headache patients for the presence of "red flags."; Appropriately manage patients with new-onset secondary headache; Apply interventional strategies for pain management with refractory headache; Interpret clinical data on emerging therapies for treatment of refractory headache.
FP 65 - 19

Child Maltreatment/Infections - Scott Krugman, MD and Richard Jacobs, MD
Establish a repertoire with a child who may have been sexually abused; Recognize injuries that are highly specific for physical abuse; Discuss the role of physicians in mandated reporting of neglect and abuse; Describe characteristics and manifestations of Cardiobacterium hominis and pyoderma gangrenosum; Identify patients who require prophylactic antibiotic treatment before undergoing high-risk procedures.
FP 65 - 20

Cardiovascular Disease (CVD): Keys to Prevention - Michael Ozner, MD, Carl J. Lavie Jr, MD and Natalie Castro, MS
Explain the pathophysiology of atherosclerosis; Review nonpharmacologic and noninterventional modalities to reduce the risk for atherosclerosis; Articulate the role of Ω-3 fatty acids in managing atherosclerosis; Use Ω-3 fatty acids in combination with statins to decrease cardiovascular morbidity; Evaluate the effects of caffeine consumption on the risk for cardiovascular disease.
FP 65 - 21

Alzheimer Disease/Hepatitis B - Verna R. Porter, MD and Steven-Huy B. Han, MD
Distinguish between major and mild neurocognitive disorder; Select appropriate laboratory and neuroimaging studies when evaluating patients for AD; Discuss emerging therapeutic approaches to AD; Recognize patients with hepatitis B who should be considered for treatment; Compare the effects and appropriate uses of tenofovir and tenofovir alafenamide.
FP 65 - 22

Combating Cardiovascular Disease (CVD) - Natalie Castro, MS, Paul E. Ziajka, MD and James A. Underberg, MD
Articulate the health risks and benefits of various dietary patterns; Recognize the importance of lipoprotein(A) as a risk factor for cardiovascular disease; Identify evidence-based strategies for screening and treatment of elevated levels of lipoprotein(A) in high-risk patients; Follow guidelines for the use of nonstatin therapy in the treatment of dyslipidemia; Determine whether a nonstatin medication should be added to a statin when treating a high-risk patient with atherosclerotic cardiovascular disease.
FP 65 - 23

Gerontology: A Clinical Update - Cathy A. Alessi, MD and Colleen Christmas, MD
Describe changes in sleep that occur with advanced age; Recognize diagnostic signs and symptoms of insomnia; Select appropriate treatment of insomnia and restless legs syndrome; Counsel patients about the use of glucosamine chondroitin and cranberry supplementation; Evaluate findings about β-blocker use and the Frailty Screening Initiative in elderly patients.
FP 65 - 24

Advances in Management of Infectious Disease - Lisa Winston, MD and Brian Schwartz, MD
State current recommendations for adult vaccination; Apply effective techniques to counter opposition to vaccination; Treat uncomplicated UTIs; Recognize situations in which asymptomatic bacteriuria should be treated; Consider options for preventing and treating recurrent UTIs.
FP 65 - 25
