*Special Association accreditation may vary.  See website.

Common Thyroid Disorders - Roland Sakiyama, MD
Identify appropriate patients to undergo screening for thyroid disorders; Select an appropriate course of management for patients with hypothyroidism; Treat thyroid disorders in pregnant patients; Distinguish between hypothyroidism and hyperthyroidism; Tailor a management plan for patients with thyroid nodule.
OT 50 - 05

Update on Laryngology - Lee Akst, MD, Simon Best, MD and Dr. Best
Recognize signs of serious disorders in patients with hoarseness; Provide care for a patient with hoarseness; Select appropriate diagnostic procedures for patients with signs of gastroesophageal or extraesophageal reflux; Outline a management plan for a patient with refractory extraesophageal reflux; Use voice characteristics to predict laryngoscopic findings in patients with voice disorders.
OT 50 - 06

Update on Otologic Disorders - Sumit Agrawal, MD, Seth Schwartz, MD and Samuel H. Selesnick, MD
Perform the Dix-Hallpike maneuver in a patient with benign paroxysmal positional vertigo (BPPV); Manage and follow a patient with BPPV; List known and speculative causes of sudden hearing loss; Outline a treatment plan for a patient with acute, sudden hearing loss; Counsel a patient undergoing surgery for a vestibular schwannoma.
OT 50 - 07

Topics in Rhinology - Douglas Reh, MD, David W. Kennedy, MD and Raymond Sacks, MD
Prioritize the goals of surgery for patients with chronic rhinosinusitis (CRS); Practice effective intraoperative and postoperative techniques to maximize good outcomes in patients with CRS; Manage postoperative medical and irrigation regimens in patients with previous surgery for CRS; Explain the role of T2R38 in patients with chronic sinusitis; Compare outcomes of patients treated with powered turbinoplasty with those of patients treated with other surgical techniques.
OT 50 - 08

Highlights from the Head and Neck Cancer and Endocrine Surgery Update, Part 1 - William R. Ryan, MD, Roy Grekin, MD and Sue S. Yom, MD
Manage a patient with a cancer of the head and neck based on guidelines issued by the National Comprehensive Cancer Network; Offer treatment options to a patient with skin cancer who is not a candidate for surgical treatment; List factors associated with high-grade toxicity in patients with cancers of the head and neck who undergo chemoradiotherapy; Summarize findings of recent and ongoing studies investigating desescalation of primary therapy in patients with cancers of the head and neck.
OT 50 - 09

Topics in Rhinology - Douglas Reh, MD, David W. Kennedy, MD and Raymond Sacks, MD
Prioritize the goals of surgery for patients with chronic rhinosinusitis (CRS); Practice effective intraoperative and postoperative techniques to maximize good outcomes in patients with CRS; Manage postoperative medical and irrigation regimens in patients with previous surgery for CRS; Explain the role of T2R38 in patients with chronic sinusitis; Compare outcomes of patients treated with powered turbinoplasty with those of patients treated with other surgical techniques.
OT 50 - 08

Highlights from the Head and Neck Cancer and Endocrine Surgery Update, Part 2 - Dolores Shoback, MD, Joey Laus, MS, William R. Ryan, MD and Adam A. Garsa, MD
Identify patients at risk for transient or permanent hypocalcemia after thyroid surgery; Counsel a patient undergoing laryngectomy about options for communication; Select appropriate candidates for transoral robotic surgery (TORS) from among patients with tumors of the head and neck; Explain the benefits and risks of transoral robotic surgery for tumors of the head and neck; Manage treatment of a patient with positive surgical margins after resection of a malignant salivary gland tumor.
OT 50 - 10

</thead>
<tbody>
<tr>
<td>Pediatric Thyroid Cancer/Nonprimary</td>
<td>Gary L. Francis, MD and Jason Prescott, MD</td>
<td>Discuss the challenges faced when diagnosing and treating pediatric thyroid cancer; Manage a child with a thyroid nodule; List risk factors for thyroid cancer in children; Create an algorithm for management of the neck in children undergoing surgery for thyroid cancer; Recognize and manage complications in patients undergoing parathyroidectomy for secondary or tertiary hyperparathyroidism.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>OT 50 - 11</td>
</tr>
<tr>
<td>What's New in Laryngology</td>
<td>Daniel Fink, MD, Robbi Ann Kupfer, MD, and Thomas L. Carroll, MD</td>
<td>List the advantages and disadvantages of treating early glottic tumors with surgery vs radiotherapy; Identify patients who may be difficult to ventilate or intubate during laryngoscopic procedures; Collaborate with an anesthesiologist to create a comprehensive plan for airway management during laryngeal surgery; Select appropriate patients for testing for laryngopharyngeal reflux; Compare the available techniques used to detect laryngopharyngeal reflux.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>OT 50 - 12</td>
</tr>
<tr>
<td>Diagnosis and Management of Obstructive Sleep Apnea</td>
<td>Sunita Kumar, MD and Neil S. Freedman, MD</td>
<td>Efficiently screen patients for obstructive sleep apnea; Select appropriate tests for diagnosis of obstructive sleep apnea; List factors associated with poor adherence with continuous positive airway pressure therapy; Manage difficulty with adherence to continuous positive airway pressure therapy; Prescribe adjunctive therapies that improve outcomes in patients with obstructive sleep apnea.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>OT 50 - 13</td>
</tr>
<tr>
<td>Infectious Diseases of the Head and Neck</td>
<td>Miriam Baron Barshak, MD and Brent A. Senior, MD</td>
<td>List common organisms and hosts involved in infections that cause Lyme disease; Recognize rare as well as common manifestations of Lyme disease; Interpret serologic tests for Lyme disease; Explain contemporary theories about the etiology of chronic rhinosinusitis; Manage a patient with chronic rhinosinusitis. QUALIFIES FOR INFECTIOUS DISEASE</td>
</tr>
