COURSE OBJECTIVE

This course is designed for the general practitioner who wishes to perform his/her own surgery and who rarely refers cases to the specialist.

It is a practical learning session, in digital format, utilizing surgical slides and videos, of numerous minor surgical procedures that the dentist can and WILL confidently perform in the office when this course is completed. The course will demonstrate techniques that have been utilized and updated successfully for over 40 years by Dr. Gaum.

It is important to emphasize that this course DOES NOT present major Maxillofacial surgery such as osteotomies, fractures, condylectomies, rhinoplasties, etc. that are of no practical or clinical value to the GP. The surgical procedures that will be taught are the “Bread and Butter” variety, allowing the participant to refine and update all surgical skills.

- How to perform a proper Examination, Assessment and Preparation of the patient
- Surgical removal of Impacted 3rd molars: Maxillary and Mandibular
- Surgical removal of erupted 3rd molars, erupted molars, and retained anterior roots,
- Diminished Traumatic Extractions
- Surgical removal of Cysts, Soft and Bony Tissue
- Surgical removal of Hyperplastic Tissue
- Surgical removal of Soft Tissue tumors: Fibromas
- Surgical removal of Tori: Torus Mandibularis, Torus Palatinus
- Surgical exposure of Impacted Cuspids: (pre-orthodontic treatment)
- Frenectomies: Maxillary labial frenectomies, (pre-prosthetic and pre-orthodontic) and Mandibular lingual frenectomy (ankyloglossia)
- What to do when things go wrong and fail. How to solve the problems.
- Incision and Drainage: Intra-Oral and Extra-Oral

COURSE OBJECTIVE cont’d from page 1

- Sutures and the Square Knot.
- The “ART” Mandibular Block. A NEW approach to regional anesthesia involving the Inferior Alveolar Nerve (V3)
- Post-Op: Treatment of Dry Sockets, Selection of appropriate medications following surgery

Results Following The learning session

Participants will discover that learning how to properly examine a patient, learning correct and simplified oral surgical techniques with proper instrument selection and their use, combined with appropriate pre and post op use of medications and other post op considerations, will no longer be complicated nor a mystery. The participating general dentist will have the confidence and the skill to perform all of the surgical techniques taught in the course.
