## EP3A Epilepsy Review

**Price:** \$485.00

**Register:** (866) 611-5599 or [www.AmericanSeminar.com](http://www.AmericanSeminar.com)

*\*Special Association accreditation may vary. See website.*

### **Epilepsy Updates - Sheryl R. Haut, MD**

Discuss revised classifications and definitions of epilepsy from the American Epilepsy Society; Select effective first-line therapies, including newer medications, for the treatment of epilepsy; Use a stepwise algorithmic approach developed by the American Epilepsy Society to manage SE; Teach patients and families how to prevent SE with rescue medications; Recognize and treat nonconvulsive SE.

NE 11 - 04

### **Seizure Mimics /Seizures - Paul Graham Fisher, MD**

Describe common types of nonepileptic neurologic events in children; Identify conditions that can provoke vertigo in children; Determine when treatment is required for tics, parasomnias, and other neurologic events in children; Counsel patients and families about seizure disorders in children; List medication options for treating focal and generalized (including absence) seizures in children.

PD 66 - 14

### **Seizures and Epilepsy/Development and Behavior - Angus A. Wilfong, MD**

Differentiate true seizures from seizure-like episodes in children; Elaborate on the systems of classification for seizures and epilepsy; Recognize manifestations associated with seizure activity in different parts of the brain; Provide effective options for treatment to patients with seizures; Apply findings of recently published articles to optimize practice related to mental health assessment, use of media, and autism spectrum disorder

PD 66 - 31

### **Update on Epilepsy/PFAPA Syndrome - Elaine C. Wirrell, MD and Penelope H. Dennehy, MD**

Distinguish among the different types of epilepsy in children and adolescents; Identify the various etiologies of epilepsy and their prognostic implications; Prescribe appropriate medications for children and adolescents with epilepsy; Evaluate common psychiatric and cognitive comorbidities of epilepsy; Assess the diagnostic characteristics of and treatment options for periodic fever with aphthous stomatitis, pharyngitis, and cervical adenitis (PFAPA) syndrome.

PD 66 - 44

### **Epilepsy/Status Epilepticus - Bernard S. Chang, MD and Amandeep S. Dolla, MD**

Identify risk factors, causes, and patterns of recurrent seizures in patients with epilepsy; Develop strategies for medical management of seizures in patients with epilepsy; Select patients with medication-refractory epilepsy who may benefit from surgical treatment or nonsurgical alternatives; Review the pathophysiology and common causes of status epilepticus; Utilize strategies for treatment of primary and refractory status epilepticus.

NE 11 - 24
