Price: $580.00
Register: (866) 611-5599 or www.AmericanSeminar.com
*Special Association accreditation may vary. See website.

Vaginitis/Electromyography - Martin A. Quan, MD and Anthony Chiodo, MD
Perform a thorough diagnostic evaluation of patients with suspected vaginal infection; Recognize signs and symptoms of bacterial vaginosis; Select appropriate therapy for bacterial vaginosis, Candida vaginitis, and trichomoniasis; Identify patterns of abnormalities on nerve conduction studies and electromyography (EMG); Interpret EMG findings to diagnose specific disorders.
FP 67 - 10

"Dirty" Urine/Bariatric Surgery - Valerie Vaughn, MD and Patrick M. Forgione, MD
Select patients for whom obtaining urine cultures is appropriate; Recognize and provide appropriate management for asymptomatic bacteriuria; Provide safe and effective treatment of uncomplicated urinary tract infection; List indications and contraindications for bariatric surgery; Counsel patients about the risks and benefits of gastric bypass surgery, gastric banding, and sleeve gastrectomy.
FP 67 - 11

Movement Disorders/Allodynia - Daniel E. Kremens, MD and Andrew M. Blumenfeld, MD
Identify early premotor signs of Parkinson disease; Select appropriate therapy for patients with Parkinson disease; Differentiate among common movement disorders; Improve the preventive treatment of migraine; Optimize the use of agents to treat allodynia and migraine.
FP 67 - 12

Opioids and Benzodiazepines/Constipation - Brooke Worster, MD and Cuckoo Choudhary, MD
List factors that contribute to opioid abuse and misuse; Review data about opioid use for chronic pain and cancer pain management; Minimize risks of opioid use by using appropriate screening tools and discontinuing long-term use; Perform testing to identify causes of constipation; Counsel patients about treatment options for constipation.
FP 67 - 13

Consequences of Care in the Elderly/Anemia - Daniel R. Hoefer, MD and Stephen M. Adams, MD
Identify the position of geriatric patients in the life cycle based on clinical findings; Counsel patients and family members about the risk for hospital-induced delirium; Minimize risks associated with medications and polypharmacy in elderly patients; Select appropriate tests to evaluate patients with suspected iron deficiency; Diagnose and treat patients with vitamin B12 deficiency.
FP 67 - 14

Heart Failure/Acute Knee Injuries - J. Thomas Heywood, MD and David T. Bernhardt, MD
Assess fluid status via physical examination of neck veins; Identify patients with heart failure who may benefit from use of ivabradine or a combination of sacubitril and valsartan; Choose medications for glycemic control that are most beneficial for patients with heart failure; Determine the mechanism of knee injury from patient history; Perform appropriate diagnostic testing in patients with acute knee injury.
FP 67 - 15

Coronary Artery Disease/HCV Drug-Drug Interactions - Michael G. Shlipak, MD and Charles W. Flexner, MD
Identify patients who may benefit from non invasive testing for ischemic heart disease; Select effective therapy for angina symptoms; Counsel patients about statin therapy and other cholesterol-lowering agents; Prescribe safe regimens for patients on acid-reducing agents and sofosbuvir, velpatasvir, or voxilaprevir; Recognize patients in whom glecaprevir and pibrentasvir should be avoided.
FP 67 - 16

Colon Cancer Screening/Inadequate Sleep - Doris B. Strader, MD and Robert Shaw, MD
Identify patients who may benefit from non invasive testing for ischemic heart disease; Select effective therapy for angina symptoms; Counsel patients about statin therapy and other cholesterol-lowering agents; Prescribe safe regimens for patients on acid-reducing agents and sofosbuvir, velpatasvir, or voxilaprevir; Recognize patients in whom glecaprevir and pibrentasvir should be avoided.
FP 67 - 17
