## GI46 Gastroenterology Update

**Price:** $580.00  
**Register:** (866) 611-5599 or www.AmericanSeminar.com  
*Special Association accreditation may vary. See website.

### Colonoscopy Tips/Endoscopy

**Education/Diverticulitis - David Greenwald, MD, Karen L. Woods, MD and Sean J. Langenfeld, MD**

Implement strategies to perform high-quality colonoscopy; Ensure that patients receive adequate bowel preparation to improve quality of colonoscopy; Utilize simulation to achieve competency in endoscopy; Train physicians, especially millennials, to achieve competency in endoscopy; Recommend nonoperative management of uncomplicated diverticulitis.

| GE | 32 - 24 |

### IBD: Part 1 - Judith Scheman, PhD, Jessica R. Philpott, MD and Bret Lashner, MD

Use the biopsychosocial approach in the management of gastrointestinal conditions; Discuss the implications of central sensitization for the management of pain; Identify the needs and expectations of a young patient with inflammatory bowel disease who is transitioning from pediatric to adult health care; Recognize and meet the health care needs of young adults with inflammatory bowel disease; Follow a postoperative algorithm for treatment of recurrent Crohn disease.

| GE | 33 - 01 |

### IBD: Part 2 - Raina Shivashankar, MD, Ari Grinspan, MD and Jean-Paul Achkar, MD

Recognize extraintestinal manifestations of IBD; Screen for osteoporosis in patients with IBD; Assess the efficacy of fecal microbiota transplantation for recurrent Clostridium difficile infection in patients with IBD; Differentiate between reactive and proactive therapeutic drug monitoring for IBD therapies; Implement reactive therapeutic drug monitoring for thiopurines and anti-tumor necrosis factor agents to optimize therapy for IBD.

| GE | 33 - 02 |

### Update on Esophageal Disorder - Kenneth R. DeVault, MD, V. Raman Muthusamy, MD and Joan W. Chen, MD

Recommend the most appropriate treatment option (medical, dietary, or endoscopy) for eosinophilic esophagitis; Identify common triggers of eosinophilic esophagitis; Assess the risk for esophageal cancer in a patient with Barrett esophagus; Implement surveillance recommendations for nondysplastic Barrett esophagus, low-grade dysplasia, and high-grade dysplasia; Choose an appropriate diagnostic tool for the diagnosis of gastroesophageal reflux disease.

| GE | 33 - 04 |

### Gastroparesis/Dyspepsia/Foreign Bodies - Michael Cline, DO, Christopher Henry, MD and Robert M. Cohen, MD

Encourage adoption of a multidisciplinary approach to the management of gastroparesis; Choose appropriate pharmacologic and surgical options for the management of gastroparesis; Adhere to guidelines for the management of dyspepsia; Identify common sites of foreign body impaction in the gastrointestinal tract; Recognize the indications for emergent endoscopy in patients with foreign body ingestion.

| GE | 33 - 03 |

### Colorectal Disease - Manish Chand, MBB, Conor P. Delaney, MD, Mark Whiteford, MD and Lester Rosen, MD

Review the ideal framework for safe assessment and implementation of new surgical technology; Apply techniques and strategies of enhanced recovery pathways for colorectal surgery in preoperative, intraoperative, and postoperative phases; Review the methods of screening for anal cancer; Recommend high-resolution anoscopy to screen for anal cancer; Review the indications of different types of setons for the management of anal fistula.

| GE | 33 - 05 |
GI46 Gastroenterology Update

Price: $580.00

*Special Association accreditation may vary. See website.

Pancreatic Illnesses - Aimee Lucas, MD, Anne Marie Lennon, MD, Peter J. Lee, MBChB, Celeste Shelton, PhD and Nathan Bahary, MD
Identify patients at high risk for pancreatic cancer; Differentiate between type 1 and type 2 autoimmune pancreatitis; Assess the impact of statins on severity outcomes in acute pancreatitis; Recognize the potential of total RNA-sequencing for elucidating disease mechanisms underlying development and progression of pancreatitis; Explain the rationale behind inhibiting autophagy in patients with pancreatic ductal cancer.
GE 33 - 06

GI Illnesses and Pregnancy - Rimma Shaposhnikov, MD, Christopher M. Tarnay, MD and Raymond Cross, MD
Prescribe medications that are safe during pregnancy; Determine the safety and necessity of endoscopic procedures for a pregnant woman; Recommend appropriate management of fecal incontinence; Use appropriate imaging modalities for diagnosis of mechanical outlet syndrome; Choose medications for women with inflammatory bowel disease that are least likely to harm their offspring.
GE 33 - 07

Communicating Online/Diets - Sean Langenfeld, MD, Sameer Islam, MD and Stephen A. McClave, MD
Elaborate on the shortcomings and limitations of physician rating websites; Implement strategies to improve a clinician’s online presence; Use social media appropriately to engage with patients; Correct misconceptions about the role of insulin and glycemic index in weight loss; Differentiate among popular weight-loss diets.
GE 33 - 08

Acute Pancreatitis and Pancreatic Imaging - Stephen A. McClave, MD
Explain the sentinel acute pancreatitis event hypothesis; Follow a management algorithm for acute pancreatitis; Define the roles of diet, genetics, and behavioral lifestyle decisions in the chronicity of pancreatitis; Differentiate among the various types of pancreatic cystic neoplasms; Choose the most appropriate imaging modality for surveillance of pancreatic cystic neoplasms.
GE 33 - 09
