Neuropathy Review

Price: Full - $540 / Short - $445
Register: (866) 611-5599 or www.AmericanSeminar.com
*Special Association accreditation may vary. See website.

Neuro-Ophthalmology: Part 1 - Nancy Newman, MD, Deborah Freidman, MD, and Gregory P. Van Stavern, MD
Diagnostic approach to vision loss; Papilledema and Idiopathic Intracranial Hypertension, Metabolic, Hereditary, Trauma, and Neuro Optic Neuropathies.
CA 03 - 13

Update on Neuro-Ophthalmology : Part 1 - Prem S. Subramanian, MD, PhD
Diagnose patients with pseudotumor cerebri and design a treatment regimen using weight loss and oral medication; Use contrast sensitivity testing, visual field testing, and optical coherence tomography to help diagnose insidious vision loss; Evaluate patients with light-near dissociation and determine whether further evaluation for other diseases is required; Recognize signs and symptoms of brain lesions that affect the optic nerves, and obtain appropriate imaging studies; Identify patients who require urgent and/or surgical management of neuro-ophthalmic disease.
OP 52 - 14

Neuro-Ophthalmology: Part 2 - Fiona Costello, MD, Christopher C. Glisson, DO, MS, and Jason Barton, MD, PhD
Inflammatory Optic Neuropathies; Visual Loss Due to Optic Chiasm and Retrochiasmal Visual Pathway Lesions; Higher Cortical Visual Deficits.
CA 03 - 14

Side Effects of Cancer Treatment - Javid Moslehi, MD and Barbara Murphy, MD
Recognize the prevalence of cardiac sequelae among patients who have undergone cancer therapy; Select treatment regimens that limit or prevent cardiotoxicity; Evaluate the evidence linking hypertension, heart failure, and ischemic heart disease to chemo- and radiation therapies; Identify specific therapeutic agents that increase the risk for pulmonary, renal, and neurologic toxicities; Anticipate and manage systemic symptoms associated with cancer therapy.
ON 05 - 14

Peripheral Nervous System Disorders: Part 1 - Mazen M. Dimachkie, MD, David S. Saperstein, MD, Hans D. Katzberg, MD, Michael K. Hehir II, and Michelle L. Mauermann, MD
Give examples of typical and atypical presentations of Guillain-Barré syndrome; Use history, physical examination, and nerve conduction studies to evaluate a patient with acquired immune demyelinating neuropathy; Recognize vasculitic neuropathies and neuropathic manifestations of rheumatologic disorders; Prevent, identify, and treat infectious neuropathies; Diagnose monoclonal gammopathies that are associated with peripheral neuropathy.
CA 03 - 17

Peripheral Nervous System Disorders: Part 2 - Ezgi Tiryaki, MD, Mario A. Saporta, MD, PhD, and James W. Russell, MD
Diagnose ALS; Discuss recent findings on cognitive deficits in patients with ALS; Diagnose Charcot-Marie-Tooth disease; Recognize common neuropathies in patients with diabetes and prediabetes; Manage a patient with diabetes in collaboration with a primary care practitioner and/or diabetologist.
CA 03 - 18

Peripheral Nervous System Disorders: Part 3 - Nathan P. Staff, MD, PhD, Mark A. Farrante, MD, P. James B. Dyck, MD, and Dan Larriviere MD, JD
Identify factors that influence or predict risk for child maltreatment; Employ direct observation of parenting behaviors and parent-child attachment patterns in assessing risk; Identify the roles of members of the parenting assessment team; Discuss the components of psychiatric evaluations and parenting interviews; Use parenting assessments as guides for legal decision making.
CA 03 - 19

Peripheral Nervous System Disorders: Part 4 - Paola Sandroni, MD, PhD, Christopher H. Gibbons, MD, Christopher H. Gibbons, MD, A Gordon Smith, MD, and Jeffrey T. Guptill, MD, MA, MHS
Identify risk factors for abuse and neglect among dependent adults; Report any suspicions or evidence of elder and dependent adult abuse through proper channels; Recognize physical, behavioral, and social clues that indicate abuse of dependent adults; Describe characteristic symptoms of PTSD and ASD; Obtain a thorough patient history about psychologic trauma and symptoms.
CA 03 - 20

Neuropathy/ The Diabetic Foot - Loretta Vileikyte, MD, Christopher Gibbons, MD, and Arthur E. Helfand, DPM
Recognize the clinical manifestations of neuropathy in patients with diabetes; Educate patients with diabetes about the causes and symptoms of neuropathy; Manage patients with diabetes who have very high glucose levels to prevent treatment-induced neuropathy; Evaluate the feet of patients with diabetes to prevent foot ulcers.
DI 06 - 01

Neuro-Oncology: Part 1 - Nicholas Butowski, MD, Amy A. Pruitt, MD, and Craig P. Nolan, MD
Collaborate with colleagues in the radiology department to plan imaging studies in patients with known or suspected brain tumors; Manage a patient with a brain tumor and seizures; Recognize and manage long-term sequelae in survivors of brain tumors; Counsel a patient on the side effects of chemotherapeutic agents and radiotherapies used for brain tumors.
CA 04 - 05
