

RADIATION ONCOLOGY - A COMPREHENSIVE REVIEW, SERIES 2

Full Course:	29.00 AMA PRA Category 1 Credits™ for CME / CEU / CPD; (EXPIRES 11/15/21)
Format:	Video
Delivery:	Interactive Online
Course Price:	\$1180
Register:	(866) 611-5599 or www.AmericanSeminar.com

COURSE DESCRIPTION

Featuring experts in the practice of Radiation Oncology, this CME program focuses on core concepts and emerging trends. Radiation Oncology – A Comprehensive Review includes case-based lectures on topics like proton radiation therapy in adults, radiation therapy for prostate cancer, spine stereotactic body radiation therapy, soft tissue sarcomas, skin cancer, and more. It will help you to better:

- Recognize the importance of clinical evaluation of cancer patients during various treatment phases
- Outline effective curative and palliative treatment goals
- Explain the potential outcomes of combining immunotherapy and radiation therapy
- Discuss the efficacy of stereotactic body radiation for spinal tumors
- Evaluate and overcome challenges encountered in radiation oncology

COURSE TOPICS

- Newer Modalities: Proton Radiation Therapy in Adults
- New Modalities: Thermal Therapies and Nanotechnology
- Imaging Applications in Radiation Therapy
- Practical Radiotherapy Management of Brain Metastases
- Radiation Therapy in the Treatment of Adult Primary Brain Tumors
- Head and Neck Tumors: Trials and PET-CT
- Head and Neck Tumors: HPV, Postop, Planning, Progression, Palliation
- Thoracic Tumors: Non-Small Cell Lung Cancer
- Thoracic Tumors: Small Cell Lung Cancer and Pleural Mesothelioma
- Radiation Therapy for Upper GI Malignancies
- Liver Stereotactic Body Radiation Therapy for Liver Metastases and Hepatocellular Carcinoma
- Lower Gastrointestinal Tumors: Colon, Rectum, Anus
- Radiation Therapy for Prostate Cancer
- Treatment for Muscle-Invasive Bladder Cancer
- Evidence Based Management of Testicular, Renal, and Penile Cancers

COURSE TOPICS cont'd on page 2

- Radiotherapy in Breast Cancer: Decision-Making after Mastectomy and Neoadjuvant Chemotherapy
- Radiotherapy in Breast Cancer: Decision-Making After Breast Conservation
- Soft Tissue Sarcomas
- Lymphomas: Non-Hodgkin Lymphoma
- Hematologic Malignancies Hodgkin Lymphoma and Plasma Cell Neoplasms
- Gynecologic Tumors: Cervix and Vagina
- Gynecologic Tumors: Uterus and Vulva
- The Experimental and Historical Development of Total Body Irradiation for Bone Marrow Transplantation
- Pediatric Malignancies I - CNS Tumors
- Pediatric Malignancies II - Non-CNS Tumors
- Skin Cancer
- Immunotherapy and Radiation Therapy
- Spine Stereotactic Body Radiation Therapy
